Animal Factory

Università statale di Milano

We are very happy to be part of the installation “La pediatria più bella del mondo” (The most beautiful paediatrics in the world) with Animal Factory, the new collection designed by Luca Boscardin and created by Magis in collaboration with Metalco.

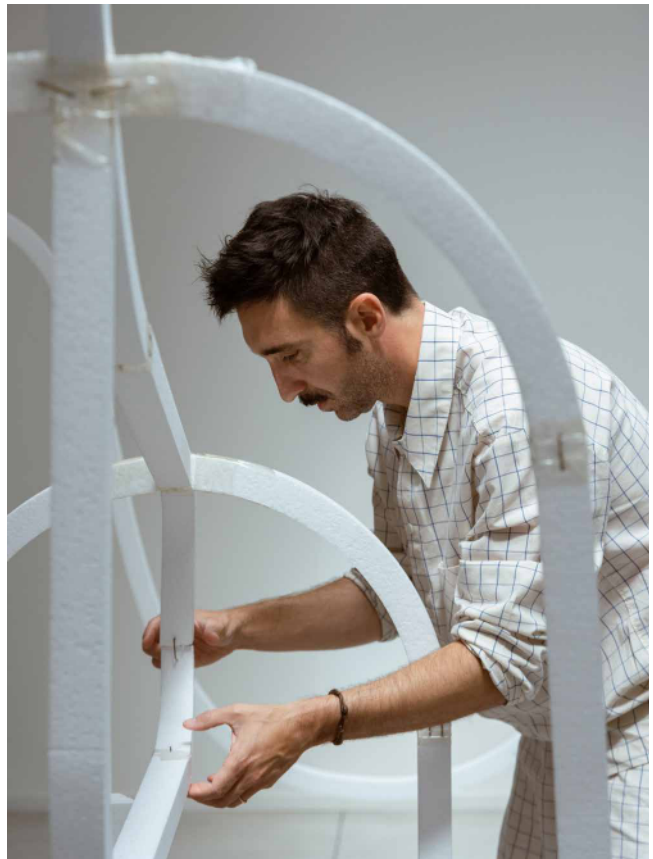

The exhibition that can be visited at the Università Statale, as well as the future paediatrics project at the Nuovo Policlinico di Milano, was curated by Novembre Studio in collaboration with Fondazione De Marchi. The aim is to show a preview of the pediatric department project, highlighting the impact that architecture and design can have on the emotionality of children in difficult situations such as illness, making them feel in a safe and familiar place.

On this occasion, Magis will have the opportunity to present and exhibit three pieces of the new Animal Factory project by Luca Boscardin, a collection of four steel tube stylised animal-shaped sculptures (giraffe, gorilla, dinosaur and crocodile) perfect to make any outdoor space unique.

The presentation of the installation will take place on 17 April at 10.30 am at the Cortile Archivio Storico Cà Granda.
